OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Current technology usage
 - Language
 - Database
 - Platform
 - Web frame
- Future technology trends
 - Language
 - Database
 - Platform
 - Web frame
- Demographic surveys
 - Gender
 - Age
 - Country
 - Education level

INTRODUCTION

- Analyze the current usage and future trends of technology based on programming languages, databases, platforms and web frames around the world.
- Objective:
 - Identify the top usage of technology
 - Identify the future trends of technology and the required skills in IT industry.
 - Observe the demographic pattern in IT sectors around the world.
- Audience: Programmers, IT professionals, CSE students

METHODOLOGY

- Data collection
- Data wrangling
- Data exploration, cleaning and preparation
- Data visualization by python and IBM cognos
- Presentation

RESULTS

PROGRAMMING LANGUAGE TRENDS

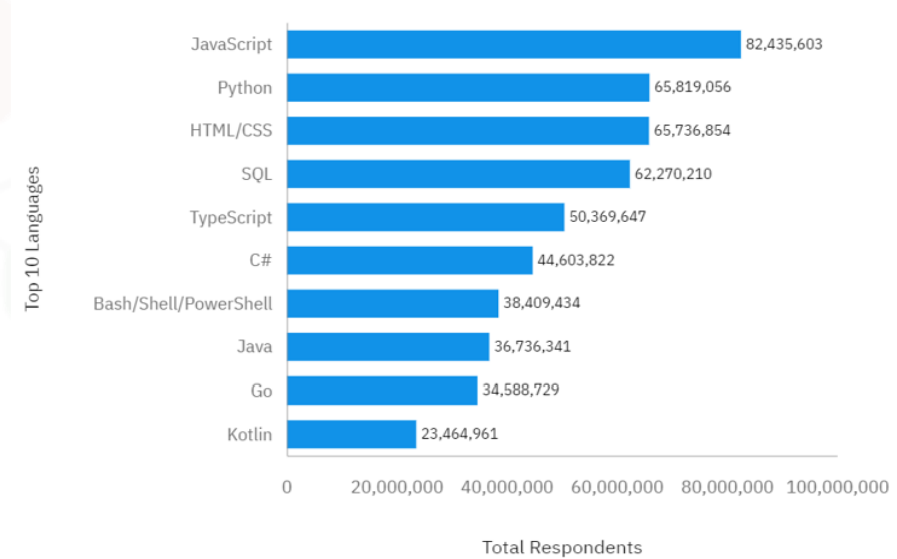

Current Year

Top 10 programming languages

Next Year

Top 10 programming languages

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript
- HTML/CSS
- SQL

Implications

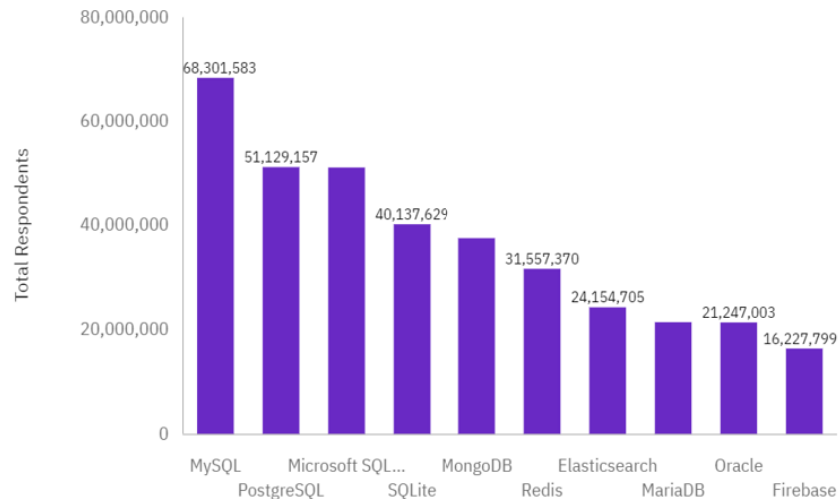

- JavaScript
- Python
- HTML/CSS

DATABASE TRENDS

Current Year

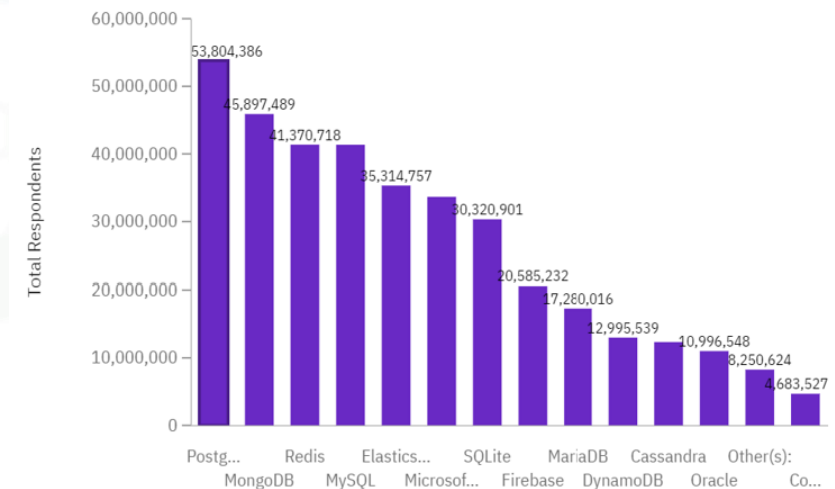

Top 10 databases

Top 10 Databases

Next Year

Top 10 databases

Top 10 Databases

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL
- PostgreSQL
- Microsoft SQL

Implications

- PostgreSQL
- MongoDB
- Redis

DASHBOARD

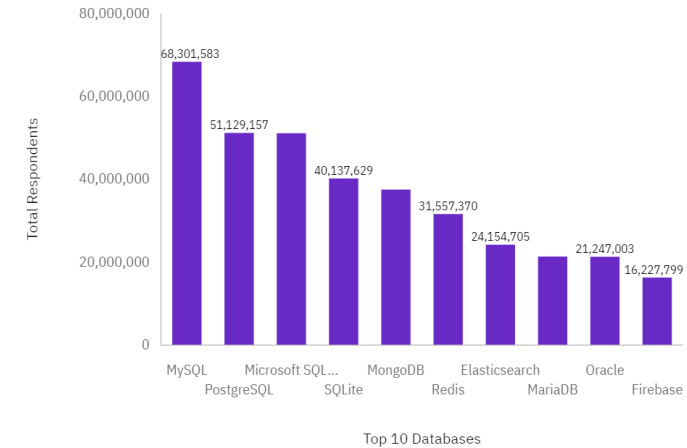

https://us1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2FNew%2Bdashboard2&action=view&mode=dashboard&subView=model0000018a85d5e1ed_00000004

DASHBOARD TAB 3

DISCUSSION

- Used the **Stack Overflow Developer Survey 2019 data** to create a dashboard that covers the **current technology usage** and the **future technology trends** for the following categories:
 - Top 10 programming languages
 - Top 10 databases
 - Top 10 Web frames
 - Desired platforms
- Gender, Age and education discriminations are observed in IT.

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScripts, Python, HTML/CSS and SQL are the most popular languages.
- PostgreSQL, Mongo DB and Redis are the most popular databases.
- Linux, Docker, AWS and Windows are the most popular platforms.
- There are age and gender discriminations.

Implications

- Programmers should always follow the latest trends of programming languages, databases, web frames and platforms.
- All the countries should get equal opportunities and need to explore and implement new technologies.
- Age and gender should not be the constrains while implementing those technologies.

CONCLUSION

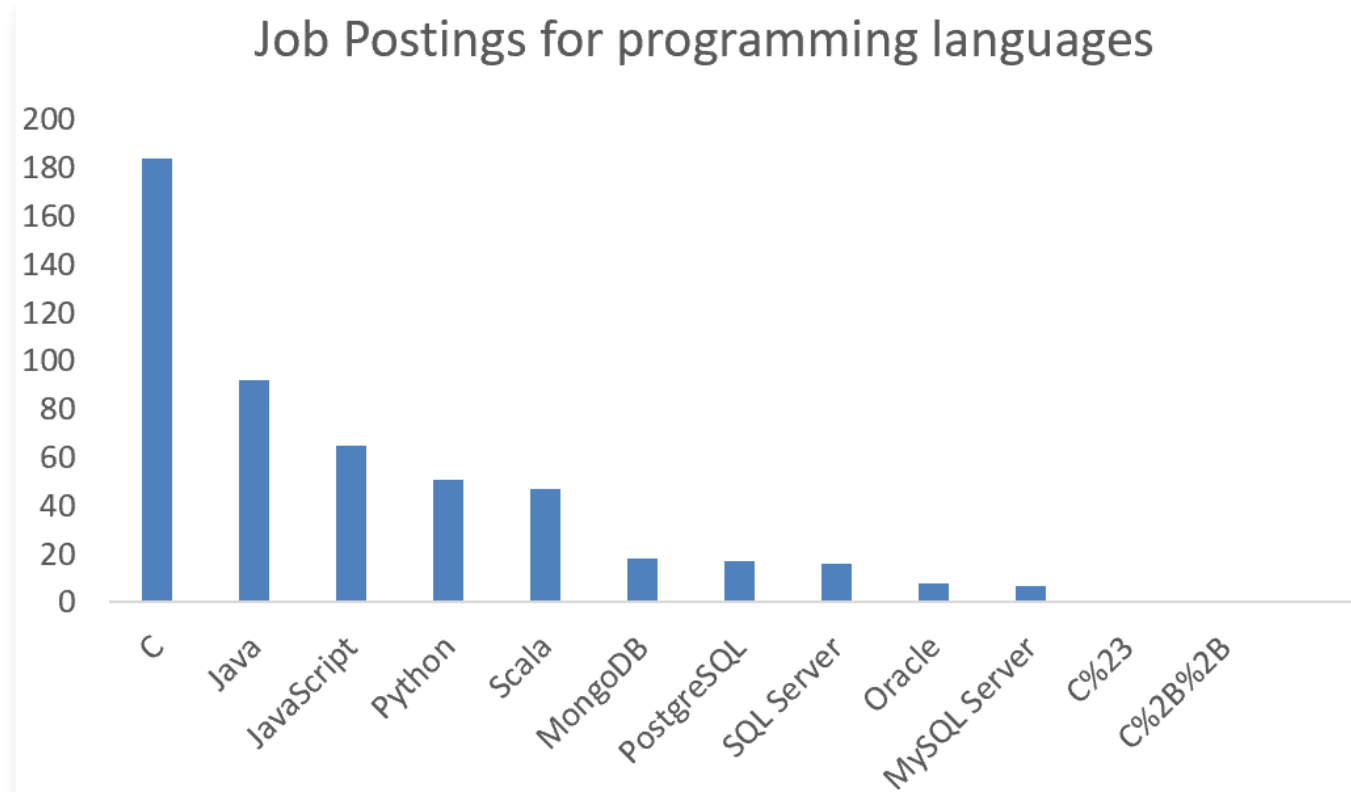

- **Current usage and future trends of**
 - Top 10 programming languages
 - Top 10 databases
 - Top 10 Web frames
 - Desired platforms
 - Demographic changes

APPENDIX

- IBM Cognos Dashboard Embedded (CDE) is an AI-fueled business intelligence service that supports the entire data analytics cycle, from discovery to operationalization.
- It provides users with data discovery capabilities to visually explore and interact with their data to identify the key insights for improving data driven decisions.
- Users can perform data discovery and then quickly assemble that information into interactive, visually appealing dashboards; all without the need of formal training.
